

# Putting the Pieces Together

**SOLUTION**

Sometimes, you can find answers when you **see how the pieces come together.**

Cut apart the seven tangram pieces in the square below and use them to create the four images shown on this page. Place each constructed image on the second page of this puzzle, using one of the given parallelogram locations to guide placement, then trace around each piece to record its location on the page. Carefully outline each individual piece in every image.

- All seven tangram pieces must be used to form each image.
- Pieces may not overlap.
- You may rotate and flip tangram pieces when building the images.
- The images below are shown to scale, but are not actual size.
- There is only one way to properly assemble each image. Pay attention to proportions and details (e.g. the man's collar and the house overhanging the cliff).
- All images should be placed with the same rotation as in the sample silhouette. Images will not overlap.

Read the letters that fall on the lines where two pieces meet up. That yields the phrase, "It feels like **TIME** to mark unused vowels in search grid." That refers to the *Searching for Clues* puzzle.

*Connecting the Dots* refers to this puzzle: "WHAT is inside tangram squares." Inside the square pieces drawn for each shape are the letters **GOLDFISH**, the "what" answer.
