Nelson

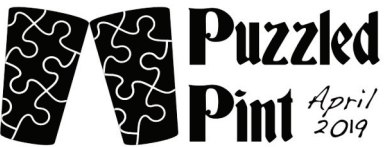

These are *Battleships* puzzles. Various-sized ships (shown beside each puzzle) are hidden on the board. Ships can't touch, not even diagonally. Numbers show how many "boat squares" are in each row or column. After you and your partner have solved your puzzles, in each column find a square that's a "hit" for both of you and write its letter in the blanks between your grids. Thusly find out where this battle took place.

Jane Jacobs

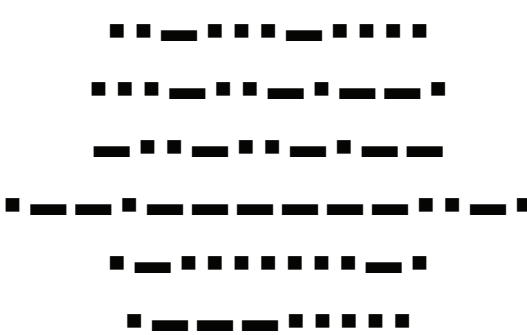

O'Reilly

Someone wrote words in Morse code but forgot the letter breaks. You and your teammate across the table can agree on where the breaks belong, but not the meanings of the resulting words. When you pull out the indicated letters, you'll end up with two bordering nations, the first one bigger than the second.

Tracing practice lines with circles. The first row shows a circle on a solid line and a circle on a dashed line. The second row shows three circles on solid lines.

What does "head to head" mean? If the "head" of a word is its beginning, then "head to head" of, for example, "never understand" could be "under-" + TO + "ne-" = UNDERTONE.
